The entry for Aug. 6. is an approximation. I was starting for the Continent in the morning of the 7th and though I took the rain omitted to enter it. The error was not discovered till my return nearly a month later. I doubt that the quantity exceeded 0.25: I am inclined to think it hardly reached 0.20. The rain on the 8th though persistent was never very heavy here, and for most of the day decidedly light. I think the amount entered is fairly correct. *from*
